

PREBIOTICS AND PROBIOTICS:

Working Better Together

IN SIMPLE TERMS, PREBIOTICS ARE A FOOD SOURCE FOR PROBIOTICS.

As prebiotics travel through the digestive system, they nourish the good bacteria along the way and help them grow and multiply. The result? More good bacteria in the gut, which means better digestion and a stronger natural defense system.

OPTIFLORA® PREBIOTIC COMPLEX

Promotes colon health by supporting the growth of healthy microflora naturally found in the colon.*

Our proprietary prebiotic blend of FOS and inulin along with mixed tocopherols, including gamma-tocopherol, a nutrient associated with colon health, help stimulate the growth of healthy bacteria.

DESIGNED TO WORK BETTER TOGETHER

OPTIFLORA® PEARL

Helps promote intestinal health and digestive balance. Patented triple-layer encapsulation for guaranteed live delivery of probiotics to the large intestine.

OPTIFLORA® DI

Clinically proven probiotic for digestive and immune health.

OPTIFLORA® PREBIOTIC COMPLEX

Helps maintain healthy digestive balance and provides nutrients to feed friendly bacteria.*

INTRODUCING OPTIFLORA® DI

NEW

Clinically proven probiotic for digestive and immune health.*

*This statement has not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.

OPTIFLORA® DI

Probiotics clinically proven for digestive and immune health*

10 billion CFUs with 4 bacterial strains, including the powerhouse *Bifidobacterium lactis* HN019™, clinically proven to support both digestive and immune health.*

*This statement has not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.

CLINICALLY PROVEN DIGESTIVE BALANCE AND COMFORT.

Helps maintain digestive health and regularity. Helps reduce occasional gas and bloating.

CLINICALLY PROVEN IMMUNE SUPPORT.

At least 70% of our immune system is in our gut. Adds good bacteria and helps restore the balance of intestinal microflora, supporting immune health.

10 BILLION CFUs WITH 4 BACTERIAL STRAINS.

This includes the powerhouse *Bifidobacterium lactis* HN019™ clinically proven to support both digestive and immune health.**

LABORATORY TESTED TO SURVIVE STOMACH ACID.

Bifidobacterium lactis HN019 is shown to survive passage through the digestive tract to the large intestine, delivering maximum benefit to the gut.

THE SHAKLEE DIFFERENCE®

Optiflora® DI delivers unique benefits via a proprietary formula with 10 billion CFUs with 4 bacterial strains, the most prominent being the powerhouse *B. lactis* HN019:

"The results demonstrate... *B. lactis* HN019 can enhance natural immunity."¹

"An effective probiotic dietary supplement for enhancing some aspects of cellular immunity."²

FREQUENTLY ASKED QUESTIONS

WHAT ARE PROBIOTICS?

Probiotics are live bacteria that are good for you, especially your digestive system. Your gut is full of bacteria, both good and bad. Probiotics are often called "good" or "helpful" bacteria because they help keep your gut healthy.

IF I CURRENTLY TAKE VITALIZER™, WHICH INCLUDES OPTIFLORA® PEARL PROBIOTIC, CAN I TAKE THE NEW OPTIFLORA® DI?

Yes. Optiflora DI and Optiflora Pearl add more good bacteria to support a healthy gut. They are designed to work together to promote comprehensive digestive and immune support.

WILL I NOTICE CHANGES UPON SWITCHING TO OPTIFLORA DI?

As with other probiotics, in the first few days of taking a new probiotic, some people may experience gas and bloating as your body adjusts. This is typically mild, temporary, and may suggest that the probiotics are working.

Optiflora® DI

Supplement Facts

Serving Size: 1 Capsule

Servings Per Container: 30

	AMOUNT PER SERVING	%DV
Digestive & Immune Enhanced Proprietary Blend	10 billion	†
